OUTPUT OF MY TERRAFORM REPO CODE

1. Output of validation of code

```
admin1@system1:~/clims-tech/terraform-aws-vpn-connection/examples/complete$ terraform validate
Success! The configuration is valid.
```

2. Output of apply of code

```
Apply complete! Resources: 4 added, 0 changed, 0 destroyed.

Outputs:

customer_gateway_id = "cgw-0f00dbc1f4f2624dc"
vpn_connection_customer_gateway_configuration = <sensitive>
vpn_connection_id = "vpn-0096e1208136ff407"
vpn_connection_tunnel1_address = "3.12.141.38"
vpn_connection_tunnel1_cgw_inside_address = "169.254.149.250"
vpn_connection_tunnel1_vgw_inside_address = "169.254.149.249"
vpn_connection_tunnel2_address = "18.220.157.14"
vpn_connection_tunnel2_cgw_inside_address = "169.254.126.34"
vpn_connection_tunnel2_vgw_inside_address = "169.254.126.33"
vpn_gateway_id = "vpn-0096e1208136ff407"
```

3. Current State list

```
admin1@system1:~/clims-tech/terraform-aws-vpn-connection/examples/complete$ terraform state list
module.vpn_connection.aws_customer_gateway.default[0]
module.vpn_connection.aws_vpn_connection.default[0]
module.vpn_connection.aws_vpn_connection_route.default[0]
module.vpn_connection.aws_vpn_gateway.default[0]
```
